

PRASANTH S

Cybersecurity Analyst | ML-Powered Security Systems | 3D Web Developer
Coimbatore, India | +91 9629365093 | prasanthsavaraj1511@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity Analyst and Full-Stack Developer specialising in ML-integrated security systems and student leadership. Nationally ranked Top 50 CTF competitor (Malla Reddy University, March 2026). Combines deep expertise in anomaly detection and SOC operations with a unique strength in immersive 3D web engineering using Three.js and WebGL. Elected Association President of the Cybersecurity Department — driving inter-collegiate competitions, workshops, and student mentorship. Certified by Google (Cybersecurity) and Cisco (Ethical Hacking). Bridges machine-learning security research, RESTful back-ends, and creative front-end engineering to deliver production-grade, scalable solutions.

WORK EXPERIENCE

Cybersecurity Researcher & Full-Stack Developer | [Metazord](#) Oct 2025 – Present | Part-Time, Coimbatore

- Engineered ML-based anomaly detection pipelines that significantly improved abnormal network-traffic identification by analysing large-scale packet datasets.
- Designed and deployed full-stack web applications powering internal cybersecurity tools and real-time SOC monitoring dashboards.
- Built RESTful APIs and FastAPI microservices for security analytics, reducing false-positive alert rates in threat detection workflows.
- Collaborated with security practitioners to integrate data-driven threat intelligence directly into production systems.

KEY PROJECTS

AI-Based Network Traffic Monitoring Dashboard

Jan 2025

- Architected a real-time SOC dashboard with custom ML anomaly-scoring engine to monitor, visualise, and triage network threats.
- Designed the ML pipeline from raw packet ingestion through feature engineering to live alert generation — end to end.
- Integrated interactive React dashboards with live anomaly score feeds, enabling one-click threat triage for SOC analysts.

Tech Stack: *Python, FastAPI, React, Scikit-learn, Machine Learning*

Civic AIShield — Real-Time Threat Detection

Jan 2025

- Built an AI-powered CCTV monitoring application using computer vision to detect suspicious activities for public safety.
- Designed a scalable processing architecture supporting continuous, low-latency inference on live video streams.

Tech Stack: *Python, Computer Vision, OpenCV, React*

Porsche 3D Animated Brand Showcase [↗ Live Demo](#)

2025

- Engineered a scroll-driven 3D landing page with cinematic camera transitions and real-time WebGL model rendering.
- Optimised asset loading and render pipelines to sustain 60 fps across desktop and mobile browsers.

Tech Stack: *JavaScript, Three.js, WebGL, GSAP, HTML5, CSS3, Netlify*

BMW 3D Interactive Experience [↗ Live Demo](#)

2025

- Created custom GLSL fragment and vertex shaders to produce dramatic lighting and reflection effects entirely in-browser.
- Deployed with lazy loading and compressed assets achieving fast initial load times without sacrificing visual quality.

Tech Stack: *JavaScript, Three.js, WebGL, GLSL Shaders, GSAP, Netlify*

Personal Information Masking Tool

Jan 2025

- Developed a high-accuracy web tool to detect and redact PII from ID documents using EasyOCR-based text extraction.
- Implemented a secure upload/download interface ensuring end-to-end data privacy with zero server-side storage.

Tech Stack: *Python, EasyOCR, Web Technologies*

Zenith & FusionX Symposium Websites

2024–2025

- ▶ Designed and launched official inter-collegiate symposium websites for KGISL Institute of Technology using Next.js.
- ▶ Both sites remain live: [zenith-kite.netlify.app](#) and [fusionxkitex.netlify.app](#).

Tech Stack: *JavaScript, Next.js, HTML5, CSS3, Netlify*

EDUCATION

B.E. Computer Science & Engineering (Cybersecurity) | [KGISL Institute of Technology](#) Jan 2024 – Jan 2028

Specialisation: Cybersecurity | Expected Graduation: 2028

LEADERSHIP & VOLUNTEERING

Association President — Cybersecurity Department | [KGISL Institute of Technology](#) 2024 – Present

- ▶ Lead the department student association, organising cybersecurity workshops, CTF events, and inter-collegiate competitions.
- ▶ Mentored junior students on security research, career paths, and technical projects, fostering a culture of innovation.

CERTIFICATIONS

- ▶ Google Cybersecurity Professional Certificate — threat analysis, risk management, incident response, SIEM, network security
- ▶ Ethical Hacking — Cisco Networking Academy (attack vectors, penetration testing, reconnaissance, defensive security)

AWARDS & ACHIEVEMENTS

- ▶ Top 50 Nationally — CTF Competition | Malla Reddy University, March 2026
- ▶ Participated in Breach Point — 24-Hour National Level CTF (2026); solved challenges in web security, Linux, and cryptography

TECHNICAL SKILLS

3D & Front-End: Three.js, WebGL, GLSL Shaders, GSAP, React, Next.js, HTML5, CSS3

Back-End & APIs: FastAPI, REST APIs, Python, Full-Stack Development

Cybersecurity: Network Security, SOC Operations, SIEM, Log Analysis, Anomaly Detection, Ethical Hacking

AI / ML: Machine Learning (Anomaly Detection), Computer Vision, EasyOCR, Scikit-learn

Languages: Python, JavaScript, Java, C, Bash

DevOps & Tools: Git, GitHub, Docker/Podman, Linux (Garuda), VS Code, Netlify
